# 1. Who You Are

---

You are part of the **Procurement** team. You see every requisition in the system and you turn approved requisitions into real purchase orders.

## 1.1 What you can do

- Monitor **Incoming PRs** — view PRs that have cleared HOD review and are now with Finance or MD, so you can begin sourcing quotations early.
- View every Purchase Requisition across all departments.
- Add supplier quotes to a requisition.
- Run an adjudication (three-quote comparison) to pick a winning vendor.
- Add and maintain the vendor master list.
- See rejected requisitions to feed back patterns to departments.
- View reports.

## 1.2 What you cannot do

- You do not approve financial requests — that is HOD / Finance / MD.
- You cannot change the items or amounts on a PR — the Incoming PRs view is read-only.
- You cannot manage users or system settings (that's Admin).

## 1.3 Your responsibilities

1. **Start sourcing early** — monitor Incoming PRs and begin collecting quotes as soon as a PR reaches Finance.
2. Collect at least **three quotes** for requisitions above the unquoted limit.
3. Run a fair **adjudication** that compares price, quality, and delivery.
4. Document the **winning vendor** and the reasoning.
5. Keep the vendor master list **clean and up to date**.
6. Issue purchase orders promptly after MD approval (outside the system).

## 2. Quick Reference Card

### One-page cheat sheet

**See PRs in the pipeline (early sourcing):** Sidebar → Procurement → **Incoming PRs**.

**See all approved PRs:** Sidebar → Procurement → Approved Requisitions.

**Add quotes:** open a PR → Quotes section → Add Quote.

**Run adjudication:** Sidebar → Procurement → Adjudication.

**Manage vendors:** Sidebar → Administration → Vendors.

**See rejections:** Sidebar → Procurement → Rejected Requisitions.

### Quote rules of thumb

1. Below the unquoted limit: no quote needed, but adding one is always welcome.
2. Above the unquoted limit: at least three quotes required.
3. Sole-source (only one supplier available): attach a written justification signed by the HOD or Finance.
4. All quotes must be in writing (PDF, email, or letterhead).

### When to push back on a requisition

- Item name too vague to source — ask the initiator to rewrite.
- Required Date impossible given procurement lead time — ask for a realistic date.
- Specified vendor has a bad history — raise with Finance before ordering.

### 3. Workflow from Your Point of View

---

#### TYPICAL SUB-FLOW:

1. PR appears in "Incoming PRs" (status = With Finance or With MD).
2. You view the PR details (read-only) to understand requirements.
3. You contact vendors externally and collect written quotes.
4. Once PR is approved, you open it and upload quotes into the system.
5. Run adjudication to pick the winning vendor.
6. After final MD approval, raise the PO with the vendor.

#### 3.1 When do you step in?

The system gives you an early window via **Incoming PRs**:

- **At pending\_finance** — the PR appears in your Incoming PRs view (read-only). Begin reaching out to vendors and collecting quotes in the background.
- **At pending\_md** — the PR is still visible in Incoming PRs. Adjudication data will support the MD's decision.
- **At approved** — upload formal quotes and record adjudication in the system, then issue the purchase order.

#### 3.2 What the system records

- Every quote you upload, with vendor, price, attachment.
- The adjudication result — who you picked and why.
- All your actions are in the audit log.

## 4. What Your Sidebar Looks Like

### REPORTS & ANALYTICS

Reports

### ADMINISTRATION

**Vendors**

### NOTE

Your Dashboard also shows a **PRs In Pipeline** metric card counting all PRs currently at *With Finance* or *With MD* status. Clicking it opens the Incoming PRs view directly.

## 5. Task 1 — Monitor Incoming PRs

The Incoming PRs view gives you a read-only window into PRs that are actively moving through the Finance and MD approval stages. Use it to start sourcing and preparing quotes before formal approval, so you are ready to act the moment a PR is approved.

### 5.1 Open Incoming PRs

- 1 Sidebar → **Procurement** → **Incoming PRs**.  
Or click the **PRs In Pipeline** metric card on your Dashboard.
- 2 The list shows every PR currently at status **With Finance** or **With MD**.
- 3 Use the search bar to filter by PR number, title, or department.

#### SCREENSHOT PLACEHOLDER

Incoming PRs list with columns: PR Number, Title, Department, Initiated By, Date, Status badge, Estimated Value, View button.

### 5.2 Understand the status badges

| Badge               | Meaning                                                              | What to do                                                  |
|---------------------|----------------------------------------------------------------------|-------------------------------------------------------------|
| <b>With Finance</b> | PR has passed HOD approval; Finance is reviewing budget and figures. | Good time to start collecting informal quotes from vendors. |
| <b>With MD</b>      | Finance has approved; awaiting final MD sign-off.                    | Finalise your vendor shortlist; confirm lead times.         |

### 5.3 View a PR's details

- 1 Click the **View** button on any row.
- 2 The PR detail page opens in read-only mode.
- 3 Review items, quantities, required date, and any notes from the initiator or HOD.
- 4 Note anything that may be difficult to source so you can raise it with the initiator early.

#### IMPORTANT

The Incoming PRs view is **read-only**. You cannot add quotes, make edits, or take approval actions here. Wait until the PR is approved before uploading quotes into the system.

#### NOTE

External quote collection (emails, phone calls, RFQ letters) can and should happen while the PR is still in the pipeline. The system records only what you upload — your external work runs in parallel.

## 6. Task 2 — Review Approved Requisitions

---

### 6.1 Open Approved Requisitions

- 1 Sidebar → **Procurement** → **Approved Requisitions**.
- 2 The list shows every PR at status **approved**.
- 3 Sort by **Required Date** ascending to see the most urgent first.

### 6.2 Open a PR detail

- 1 Click a row.
- 2 Check: vendor selected (if any), winning quote, adjudication outcome.
- 3 If no vendor is selected yet, you need to complete that before raising a PO.

#### SCREENSHOT PLACEHOLDER

Approved requisitions list with columns ID, department, total, vendor, required date.

### 6.3 Reach out to the initiator (optional)

- 1 If any detail is unclear, contact the initiator before placing the order.
- 2 Document the clarification in the comments section of the PR.

## 7. Task 3 — Collect and Add Quotes

---

### 7.1 Collect quotes externally first

- 1 Email, phone, or visit each candidate vendor.
- 2 Ask for a written quote including:
  - 3 Itemised unit prices
  - 4 Currency
  - 5 Validity period
  - 6 Delivery lead time
  - 7 Payment terms
- 8 Save each quote as a PDF with a clear name (e.g. `Quote_TechSolutions_KSB-PR-20260421.pdf` ).

#### NOTE

You can start collecting quotes while the PR is still in the Incoming PRs view (pending\_finance or pending\_md). Upload them into the system once the PR is fully approved.

### 7.2 Open the PR detail page

- 1 Sidebar → **Procurement** → **My Requisitions** or **Approved Requisitions**.
- 2 Click the PR you're working on.
- 3 Scroll to the **Quotes** section.

### 7.3 Add a quote

- 1 Click **Add Quote**.
- 2 Select the **Vendor** from the dropdown. If the vendor is new, add them first via Administration → Vendors (see Task 5).
- 3 Enter **Unit Price** for each item in the PR.
- 4 Select **Currency**.
- 5 Attach the **Quote PDF**.
- 6 Enter the **Validity Period** (e.g. 30 days from quote date).
- 7 Click **Save Quote**.

## 7.4 Repeat for each quote

- 1 Add at least three quotes for comparison, if the PR requires them.
- 2 If only one quote is possible (sole-source), note the reason in the Comments section.

### SCREENSHOT PLACEHOLDER

Quotes section of a PR showing three quotes: Tech Solutions (lowest), Office Supplies Co, Furniture World.

## 8. Task 4 — Run Adjudication

---

Adjudication is the formal process of comparing quotes and choosing a winner.

### 8.1 Open the Adjudication page

- 1 Sidebar → **Procurement** → **Adjudication**.
- 2 The page lists PRs that have multiple quotes but no adjudication yet.
- 3 Click the PR you want to adjudicate.

### 8.2 Review the side-by-side comparison

- 1 The system shows each quote as a column.
- 2 All non-ZMW prices are automatically converted to ZMW using the current FX rate.
- 3 Look at:
  - 4 Total cost in ZMW
  - 5 Lead time
  - 6 Payment terms
  - 7 Vendor rating / tier

### 8.3 Pick the winner

- 1 Select one quote as **Winner** using the radio button or "Select as winner" action.
- 2 The winning quote does NOT have to be the cheapest. Cheapest, fastest, or best quality are all valid criteria — but you must justify.

### 8.4 Record the rationale

- 1 Fill in the **Rationale** text box.
- 2 Be specific. Examples:
  - 3 "Tech Solutions — lowest total and shortest lead time."
  - 4 "Office Supplies Co — not cheapest, but 30-day payment terms save cash flow."
  - 5 "Furniture World — tier-1 vendor, 3-year warranty vs 1-year from others."
- 6 Click **Save Adjudication**.

## 8.5 After adjudication

- 1 The PR now has a selected vendor locked in.
- 2 Finance and MD see the adjudication data during their approval.
- 3 You can re-open the adjudication if needed — changes are audit-logged.

### IMPORTANT

If you deviate from the cheapest option, write a clear rationale. Auditors review adjudications where the cheapest quote lost.

## 9. Task 5 — Manage Vendors

---

### 9.1 Open the Vendor list

- 1 Sidebar → **Administration** → **Vendors**.
- 2 Search for an existing vendor by name or code.

### 9.2 Add a new vendor

- 1 Click **Add Vendor**.
- 2 Fill in:
  - 3 **Name** (required)
  - 4 **Code** (short unique identifier, e.g. TSL001)
  - 5 **Category** (IT Equipment, Office Supplies, Furniture, etc.)
  - 6 **Contact person** and phone
  - 7 **Email**
  - 8 **Tier** (1 = preferred, 2 = approved, 3 = trial)
  - 9 **Rating** (1-5 stars based on past performance)
  - 10 **Status** — set to `active`
- 11 Click **Save**.

### 9.3 Update a vendor

- 1 Click the vendor row.
- 2 Change the details.
- 3 Save.

### 9.4 Disable (don't delete) an inactive vendor

- 1 Open the vendor.
- 2 Change Status to `inactive`.
- 3 Save.
- 4 Historical quotes and POs remain intact — the vendor just doesn't appear in new-quote dropdowns.

## 9.5 Bulk upload from Excel

- 1 Download the vendor template from the Vendors page.
- 2 Fill in all columns.
- 3 Click **Upload from Excel**.
- 4 The system validates and imports. Errors are reported row-by-row.

### NOTE

Never delete a vendor who appears on any past quote or PR — it breaks the audit trail. Disable instead.

## 10. Task 6 — Track Rejected Requisitions

---

### 10.1 Open Rejected Requisitions

- 1 Sidebar → **Procurement** → **Rejected Requisitions**.
- 2 The list shows every PR at status **rejected**.

### 10.2 Review rejection reasons

- 1 Click a row.
- 2 Read the approval history comments.
- 3 Identify patterns: which departments have most rejections? Which items? Which reasons?

### 10.3 Share feedback monthly

- 1 Summarise rejection patterns.
- 2 Share with HODs to improve their team's initial submissions.
- 3 Use the **Reports** page for formal numbers.

## 11. Task 7 — Reports

---

### 11.1 Summary Reports

- 1 Sidebar → **Reports & Analytics** → **Reports**.
- 2 Pick a date range (Last 30 Days for monthly view).
- 3 Export to Excel or PDF.

### 11.2 Useful filters for Procurement

- 1 By department — which departments are spending the most?
- 2 By vendor — which vendors are we using most?
- 3 By status — how many PRs are stuck at each stage?

### 11.3 FX Rates visibility

- 1 Sidebar → **Financial Planning** → **FX Rates** (view-only for Procurement).
- 2 Use this to check what rates are being applied to foreign-currency quotes.
- 3 If rates look stale, tell Finance.

## 12. Troubleshooting

---

### 12.1 I can't see any PRs in Incoming PRs

1. There may be no PRs currently at *pending\_finance* or *pending\_md* — this is normal when the pipeline is empty.
2. Try refreshing the page.
3. Check your role — only Procurement and Admin see this view.

### 12.2 I can't add a quote — the Add Quote button is missing

1. Check your role is Procurement or Admin.
2. Check the PR is not already **rejected** — quotes can't be added to rejected PRs.
3. Try refreshing the page.

### 12.3 A quote I uploaded doesn't appear

1. Refresh the PR detail page.
2. Check the file size — must be under 10 MB.
3. Check the file format — PDF preferred; JPG / PNG / Excel / Word also accepted.

### 12.4 The ZMW total on adjudication is wrong

1. FX rate may be stale. Ask Finance to refresh the rate for that currency.
2. Then refresh the adjudication page — the new total will appear.

### 12.5 The vendor dropdown doesn't include the vendor I need

1. Vendor may be set to **inactive**. Open Administration → Vendors, find them, and set to **active**.
2. Or the vendor doesn't exist yet — add them (Task 5).

### 12.6 I selected the wrong winner by mistake

1. Re-open the adjudication.
2. Select the correct quote as winner.
3. Save. The change is audit-logged with your name and timestamp.

## 13. Appendix

### 13.1 Vendor tiers

| Tier          | Meaning                               | When to use                                              |
|---------------|---------------------------------------|----------------------------------------------------------|
| 1 — Preferred | Top-tier supplier with strong history | Anytime; use without extra justification                 |
| 2 — Approved  | Reliable supplier on roster           | When tier-1 is not suitable                              |
| 3 — Trial     | New supplier being evaluated          | Only when tier-1 and tier-2 can't serve; monitor closely |

### 13.2 Typical PR lead times

| Category                   | Typical lead |
|----------------------------|--------------|
| Office stationery (local)  | 1-3 days     |
| IT equipment (local stock) | 3-7 days     |
| IT equipment (import)      | 2-6 weeks    |
| Furniture (custom)         | 4-8 weeks    |
| Vehicles / large machinery | 8-16 weeks   |

Use these figures to challenge unrealistic Required Dates.

### 13.3 Incoming PRs vs Approved Requisitions — what's the difference?

| View                  | Status shown             | Can edit?                   | Purpose                                                       |
|-----------------------|--------------------------|-----------------------------|---------------------------------------------------------------|
| Incoming PRs          | With Finance,<br>With MD | No — read-only              | Early sourcing: begin collecting quotes before approval       |
| Approved Requisitions | Approved                 | Yes (quotes & adjudication) | Formal procurement: upload quotes, run adjudication, issue PO |

### 13.4 Checklist before closing a PR

- All quotes uploaded.
- Adjudication complete with rationale.
- Winning vendor selected.
- PO issued externally.
- Delivery date confirmed with vendor.
- GRN team informed of expected delivery.
